SUMMARY

With a zest for coding and an eye for innovation, I am an aspiring Java Developer who thrives on creating practical, efficient, and engaging solutions. My foundation in Java Servlets, Hibernate, and Spring Boot, coupled with hands-on experience in diverse projects, fuels my passion for problem-solving and crafting exceptional user experiences. During my internship at Oasis Infobyte, I independently developed and optimized various projects, honing my skills in backend and frontend technologies. Now, I'm eager to leverage this experience and collaborate with a dynamic team to build cutting-edge software that leaves a lasting mark in the world of technology.

PROJECTS

RailConnect - Online Railway Ticket Booking System

Oasis Infobyte • September 2023 - October 2023

- Developed a railway ticket booking system using Java Servlets, Hibernate, and HTML/CSS for the front-end.
- Solely designed, developed, and implemented the application's functionality, including database integration, User authentication.
- Achieved seamless integration of multiple technologies for a user-friendly ticket booking experience.
- Implemented efficient error handling and data validation techniques for enhanced application reliability.

Premate - Online Examination System

Oasis Infobyte • September 2023 - October 2023

- Contributed independently to the development of an online examination system using Hibernate, Servlets, and Spring Boot.
- Implemented secure user authentication and authorization systems for the exam platform.
- Designed and optimized the database structure for efficient storage and retrieval of exam data.
- Ensured a seamless and intuitive user interface, enhancing the overall user experience.

Hospital Search Website

Uttarakhand Open University • January 2021 - May 2021

- Independently developed a website allowing users to search for hospitals by location using Java Servlets and Hibernate.
- Implemented an intuitive search algorithm for efficient hospital location retrieval.
- Integrated Google Maps API to provide users with directions and location visualization.
- Ensured a responsive design for seamless user experience across devices.

EDUCATION

Master of Science in Information Technology

Minor in Java Programming • Uttarakhand Open University • Uttarakhand, India • 2022 • 75%

Bachalar Of Science in Physics

Minor in Physics • University Of Mumbai • Mumbai, India • 2019 • 6.45

HSC

Maharashtra State Board • Mumbai • 2016 • 58%

CERTIFICATIONS

JAVA PROGRAMMING I

University Of Helsinki

Responsive Web Development

FreeCodeCamp

SKILLS

- Java (Core and Advanced)
- Java EE, Spring (Boot, MVC, Data), Hibernate
- Java Servlets, JSP, RESTful Web Services
- HTML5, CSS3, JavaScript, XML, JSON
- SQL, MySQL, PostgreSQL, Oracle
- Maven, Git
- JUnit, Design Patterns
- Agile, Scrum
- IntelliJ IDEA, Eclipse, NetBeans
